Subject: Microsoft Settlement

To Whom It May Concern at the Justice Department:

Enough already with trying to punish Microsoft. As a consumer, I am happy with their products, and think they do a better job than anyone else. All this trial did was waste taxpayer money, and punish investors. It is time for the government to get out of trying to regulate industries, and let the market do its own work. The market is far better at regulating competition than lawyers and bureaucrats!!! Let the market and consumers decide which products are the best!! Untie corporations' hands and let them do their work of producing superior products WITHOUT government interference! In this economy, we need to let our companies produce new and innovative products and technologies to help create new jobs. It is time to end Clinton's era of anti-trust law abuse. The settlement is enough. Stop now.

Sincerely,
Karen Mazza
